

HEPAire FAN FILTER UNIT—115V

Project # Date:

Quote # Customer Ref #

STANDARD FEATURES

- Anodized aluminum framed 63mm (2.5") HEPA filter pack with painted protective screen downstream
- Minimum HEPA filter efficiency 99.99% at 0.30 microns
- Backward curved centrifugal fans
- Variable speed control with on/off to help increase HEPA filter life cycle
- MERV 8 pleated pre-filters, 100% synthetic media that does not support microbial growth
- Standard 9-foot 3-prong electrical cord for quick connections
- Filter housing manufactured from durable light-weight 16-gauge aluminum with sealed edges

OPTIONAL ACCESSORIES

- Powder coated filter housing
- HVAC collar connection
- Suspension hardware
- Tamper-proof speed control cover
- Down stream gasket for T-grid installation
- High Capacity MERV 10 pre-filter in lieu of MERV 8
